GOT A POISON EMERGENCY?

Call the ASPCA Hotline at (888) 426-4435.

Ask Today About the Year-Round Dangers of Heartworms, Hookworms and Roundworms.

- Dogs are at risk of getting hookworms and roundworms all year-round. Puppies are especially susceptible, as most puppies in the United States are born with hookworms and roundworms or get them shortly after birth during nursing.¹
- Just one bite from an infected mosquito can lead to heartworms in your dog. Mosquitoes live inside and outside your house and can pose a threat all year-round.

Remember, dogs are at risk for heartworms, hookworms and roundworms in the winter months too. Give your dog HEARTGARD® Plus (ivermectin/pyrantel) year-round.

Happy Holidays!

Heartgard®
(ivermectin/pyrantel) **Plus**

IMPORTANT SAFETY INFORMATION: HEARTGARD® Plus (ivermectin/pyrantel) is well tolerated. All dogs should be tested for heartworm infection before starting a preventive program. Following the use of HEARTGARD Plus, digestive and neurological side effects have rarely been reported. For more information, please visit www.HEARTGARD.com.
